INTRODUCTION

My name is Agwang Leticia Winifred .A student at Uganda Christian University persuing a bachelor’s degree in computer science. I have this unbeareable itching interest in computer programming and problem solving and at the end of my three year course I really hope to have achieved alot out of my stay here .

ABOUT ME

I am really amazed by how computers work and produce output of what someone has fed into it.I als love christian ministry and attended several of them especially those that include outreaches,praise and worship sessions, bible study picnics and interacting with different people.These have greatly helped me strengthen my faith.

I love watching people play basketball and netball, in the processing of learning how to knit and come up with different beautiful things.I love listenig to music while carrying out other tasks such as washing, cleaning among others it helps me concentrate better

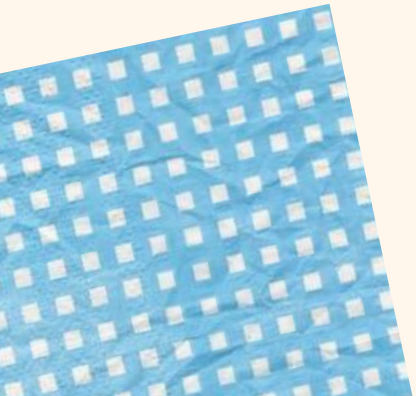

SKILLS AND COMPETENCIES

Learning how to achieve tasks using Cand python programming
communication and teamwork since most assignments are given to us im groups so we work in our groups accordingly and come up the the best of what we were asked to research upon or disscus about.

Data entry is also one of my achieved skills.
Poultry rearing because its mostly what I learnt to do how to interact with birds ,study their behaviour,how they communicate and all to do with them especially chicken and turkeys.
knitting also though am still in the learning process and how to come up with amazing work out of crocheting.

LEARNING JOURNEY

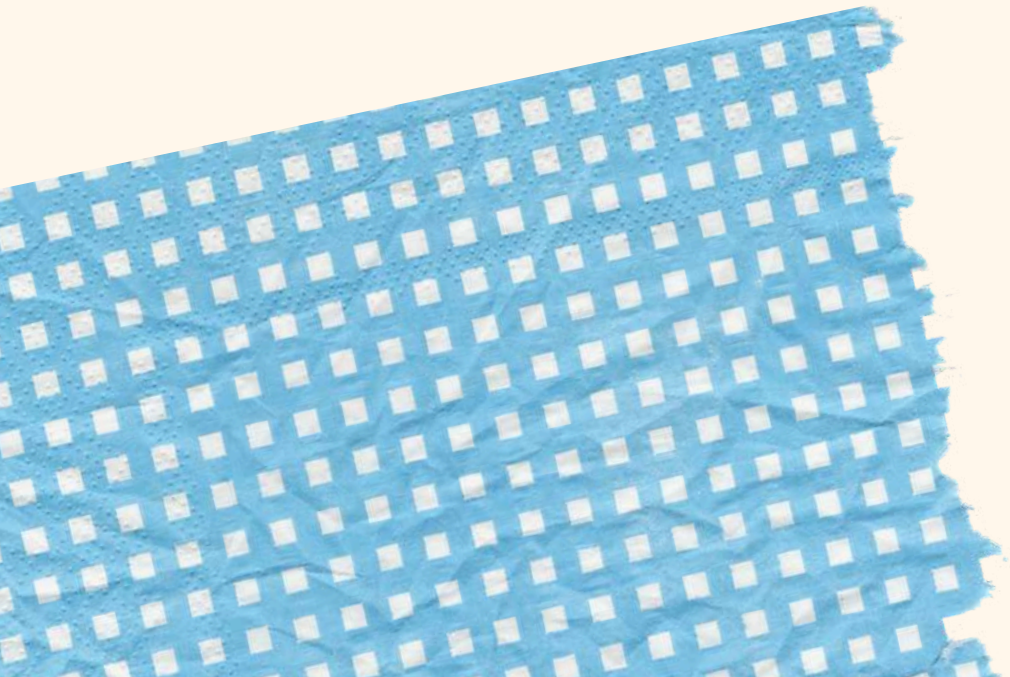

- Developing discipline, patience, independent and teamwork learning.
- Learning how to plan, write, test, run and improve programs according to the purposes they are designed to achieve or perform.
- Building confidence through practice and feedback.

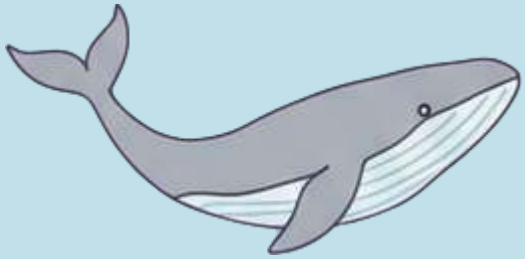

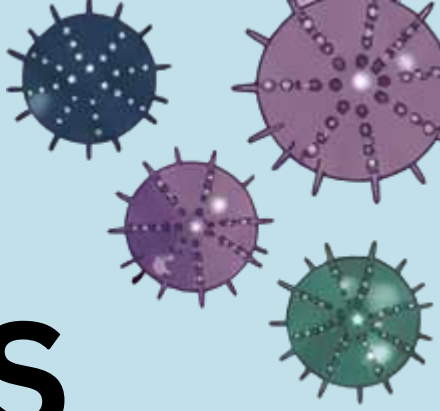

ACADEMIC GOALS

My academic goal is to build a strong foundation in Computer Science and develop the knowledge and practical skills required to succeed in the technology field.

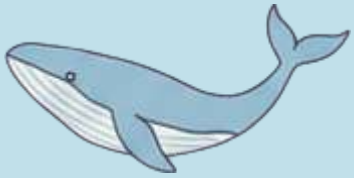

- Understand programming languages and computer systems.
- Improve my coding, logical thinking, and problem-solving skills.
- Participate in practical projects that help me apply what I learn.
- Develop teamwork, communication, and time-management skills.
- Complete my studies successfully and prepare for a career .

LIFE GOALS

Achieve academic excellence and life excellence in whatever aspect or field I will be in.

Build upon a life that draws me closer to God and is evident to the people around me that it is all God's doing.

Give back unto my parents as a way of being grateful and make them proud of the lady I grow up to be.

Most importantly draw my family and relatives to always know that it has always and will always be God, and only God alone.
